U.S. Army Materiel Command

Army Sustainment Command Update

Presented to

AMC PARC Conference Fall 2005

Presented By:

Mr. Gregory Kee

AMC Deputy G3 for Future Operations

2 November 2005

Purpose

To provide information on the Army Sustainment Command and discuss actions being worked to stand-up the command by 1 Oct 06

Agenda

- **Background**
- **ASC Mission Organization and Functions**
- **Evolving C2 Relationships**
- **AFSBs and Contingency Contracting Mission**
- **Way Ahead**

Background

(Key Points AMC G-3 Briefed to VCSA)

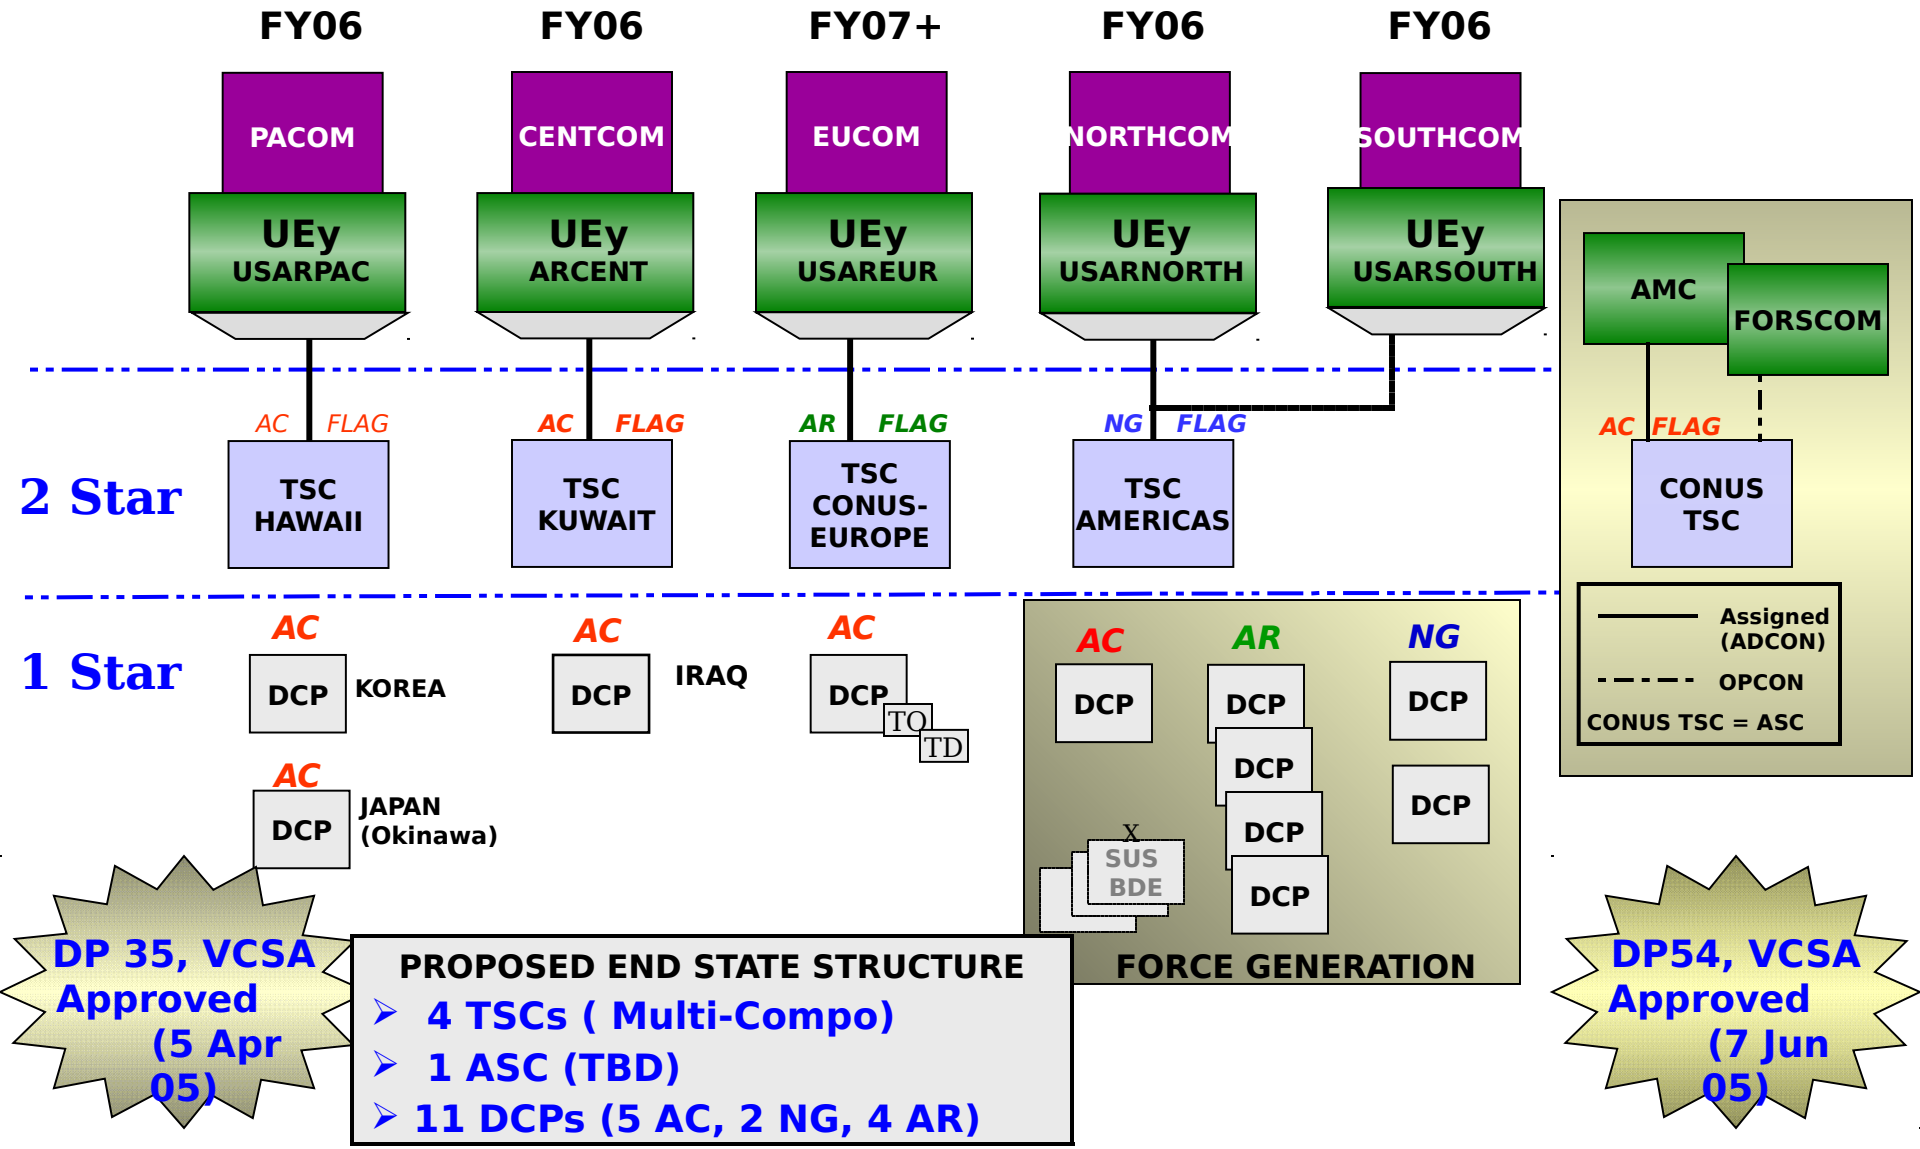
VCSA Approved 7 June 2005

The Army Sustainment Command should:

- **Link Institutional Army support to Expeditionary Ar**
- **Use TRADOC standard TSC TOE structure as basis for building the ASC; Add TDA as required**
- **Provide logistics integration and support to deploying forces and redeploying forces entering Reset**
- **Leverage AFSC's existing "logistics integrator" role at CONUS installations**
- **Partner with IMA and TRANSCOM for execution of CONUS Deployment Operations similar to how 21st TSC operates in USAREUR today**
- **Be assigned (ADCON) to AMC; OPCON to FORSCOM for ARFORGEN***
  - **CONUS-based DCPs and Sustainment Bdes ADCON to ASC; OPCON**

* **Note: Relationship has changed since 7 Jun 05 VCSA briefing. ASC now has a "Supporting" relationship to FORSCOM for ARFORGEN.**

Approved TSC Structure*



DP 35, VCSA Approved (5 Apr 05)

PROPOSED END STATE STRUCTURE

- 4 TSCs (Multi-Compo)
- 1 ASC (TBD)
- 11 DCPs (5 AC, 2 NG, 4 AR)

DP54, VCSA Approved (7 Jun 05)

** This chart represents the approved TSC Structure as of 7June 2005. Several changes have occurred si not OPCON to FORSCOM (It supports FORSCOM). We also no longer use UEy naming convention (now*

ASC Mission and Capabilities

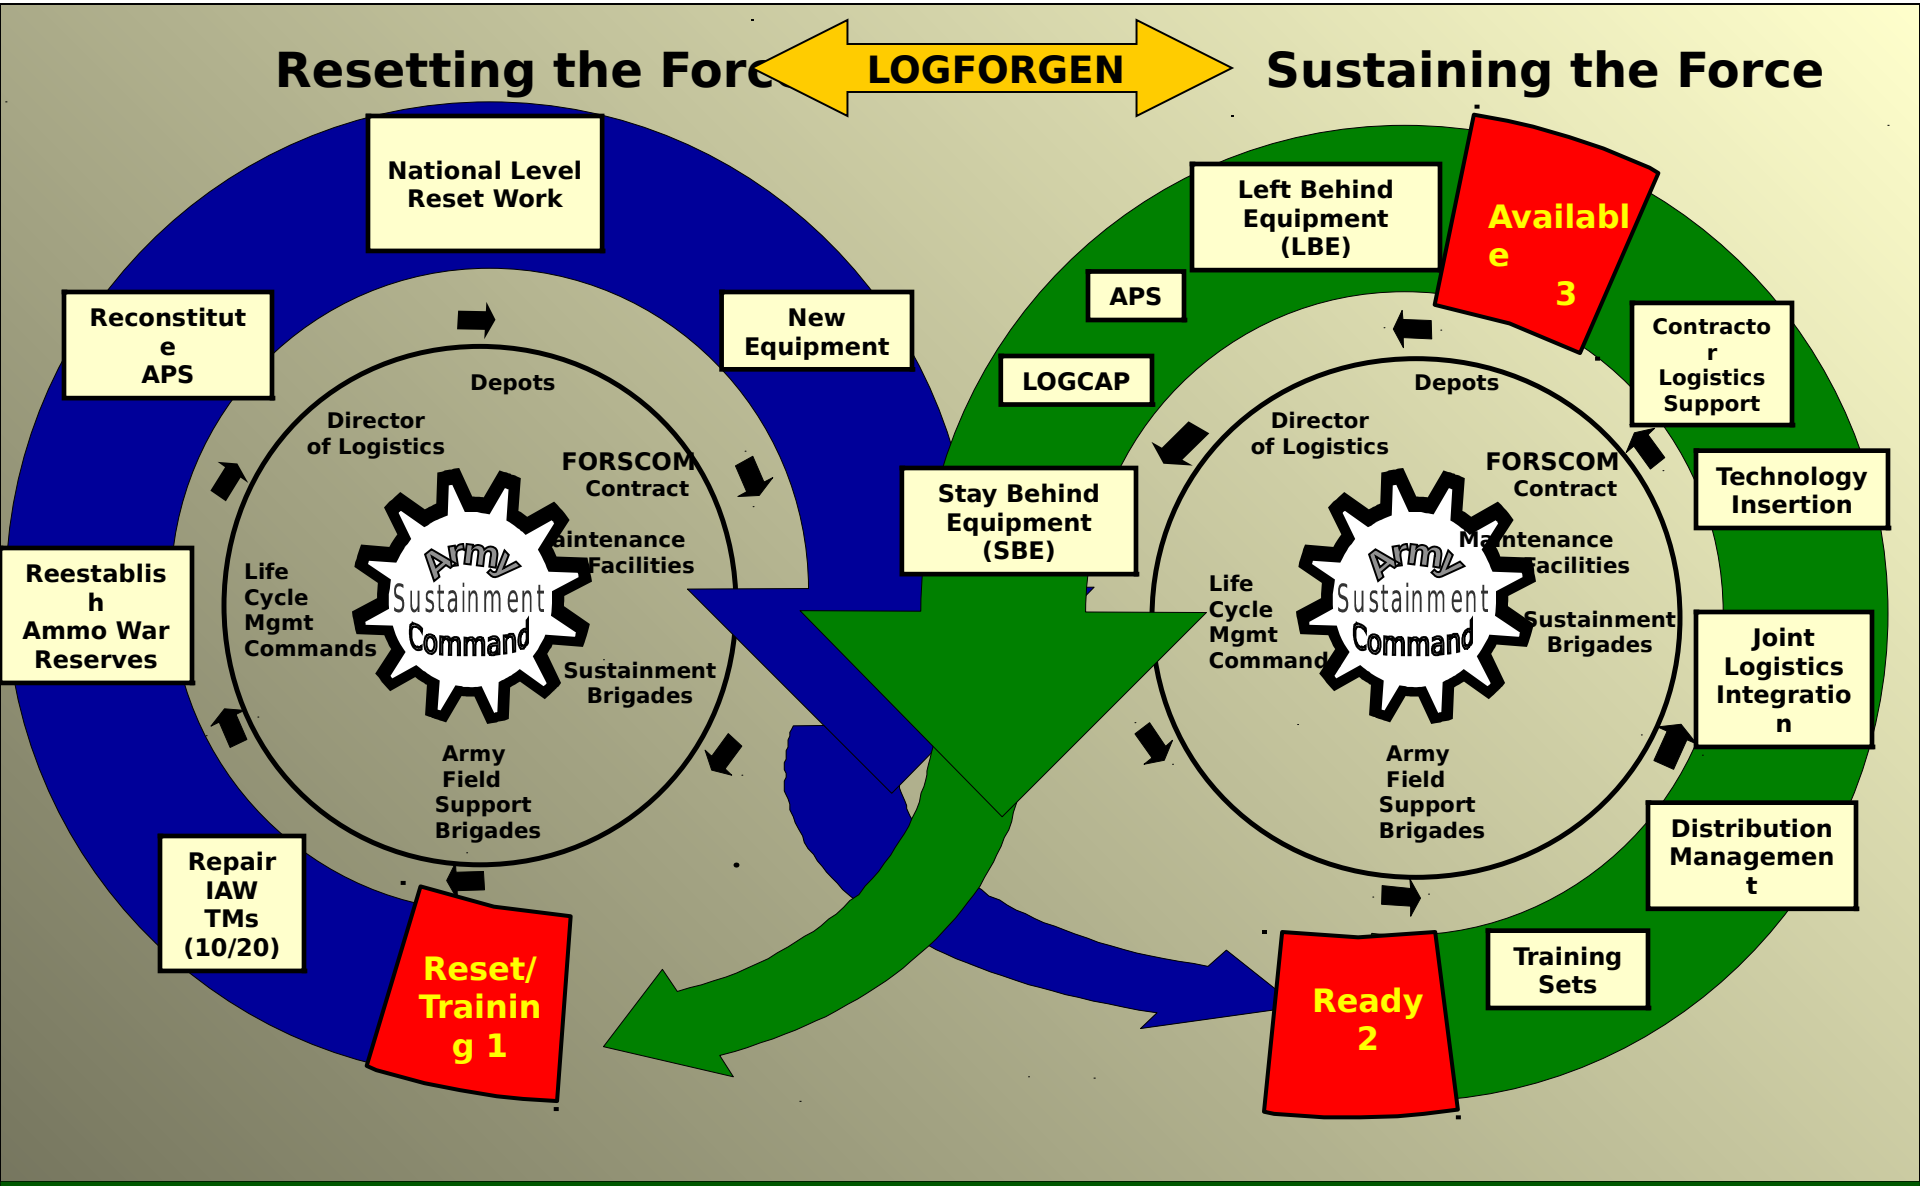
Mission: To plan, prepare, rapidly deploy subordinate units, and execute

logistics from the National Sustainment Base

Capabilities:

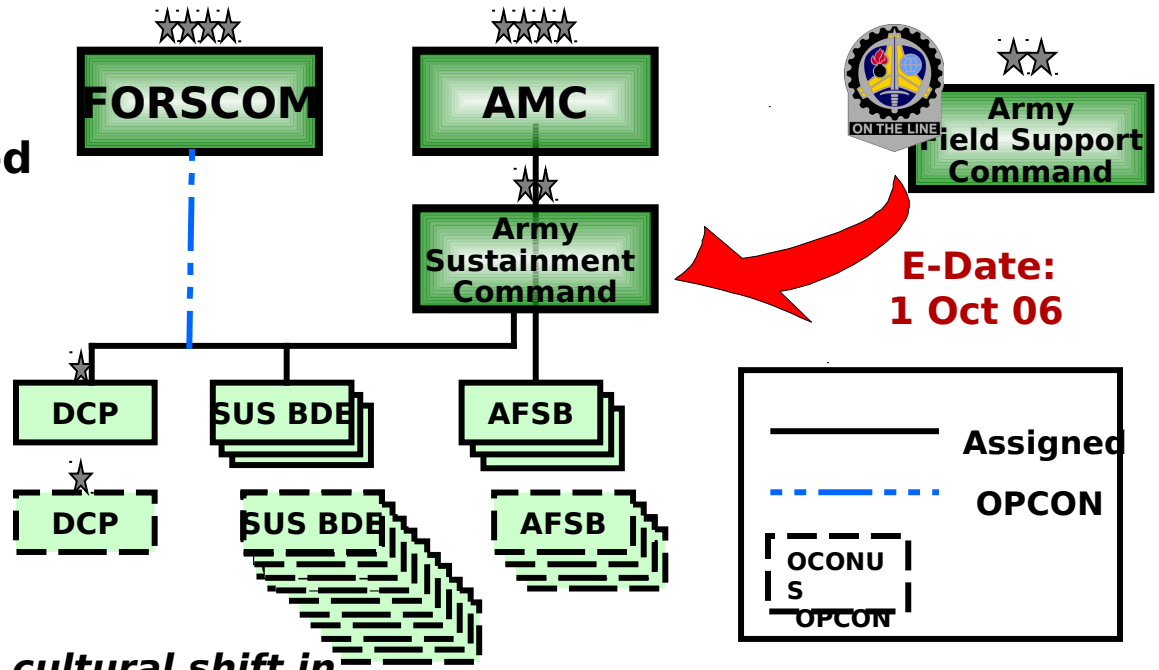
- Single Army integrator of logistics with joint and strategic partners in the national sustainment base.
- Coordinates End-to-End distribution pipeline from national sustainment base to deployed TSCs
- Nationally focused, subordinates globally employable
- Provides C2 and training readiness oversight of assigned forces
- Capable of providing backup support for homeland defense and military assistance to civilian authorities
- Assists FORSCOM with Force generation and rapid projection of trained and ready forces from CONUS base to RCC and Reset of forces upon return to home station
- Integrates existing AFSC capabilities: AFSBs, LOGCAP and APS

Support to ARFORGEN



Converting AFSC to the ASC

- ASC Concept Plan submitted to HQDA on 30 Sep 05
- Organization will include ~ 250 Soldiers



Key Points

✓ *Not just AFSC renamed ... but a cultural shift in AMC support to the field Army*

✓ *Focuses on the ARFORGEN process...it's the Army's CONUS Theater Support Command*

✓ *Provides sustainment and logistics integration with joint, national partners and the Army Industrial Base*

✓ *Enhances readiness and assists in power*

✓ *Provides Title 10 support for and trainin readiness and oversight of, assigned f including CONUS-based SUS BDEs and*

✓ *Retains responsibility for the readiness APS and the LOGCAP missions of the U.S. Army Field Support Command*

✓ *Splits Joint Munitions Command which become the JM LCMC*

Proposed ASC Structure

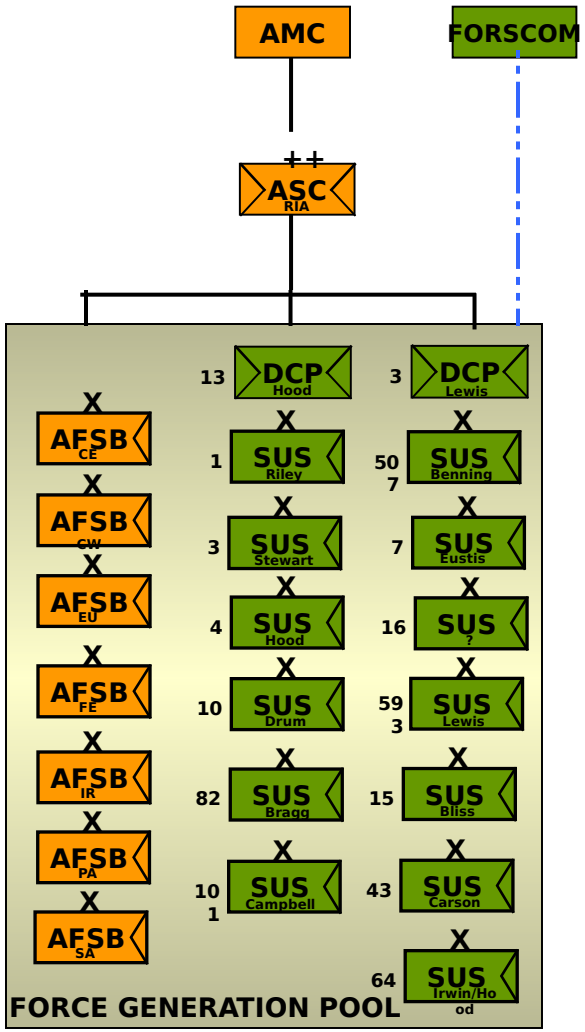
Proposed Log C²
Army Sustainment Command



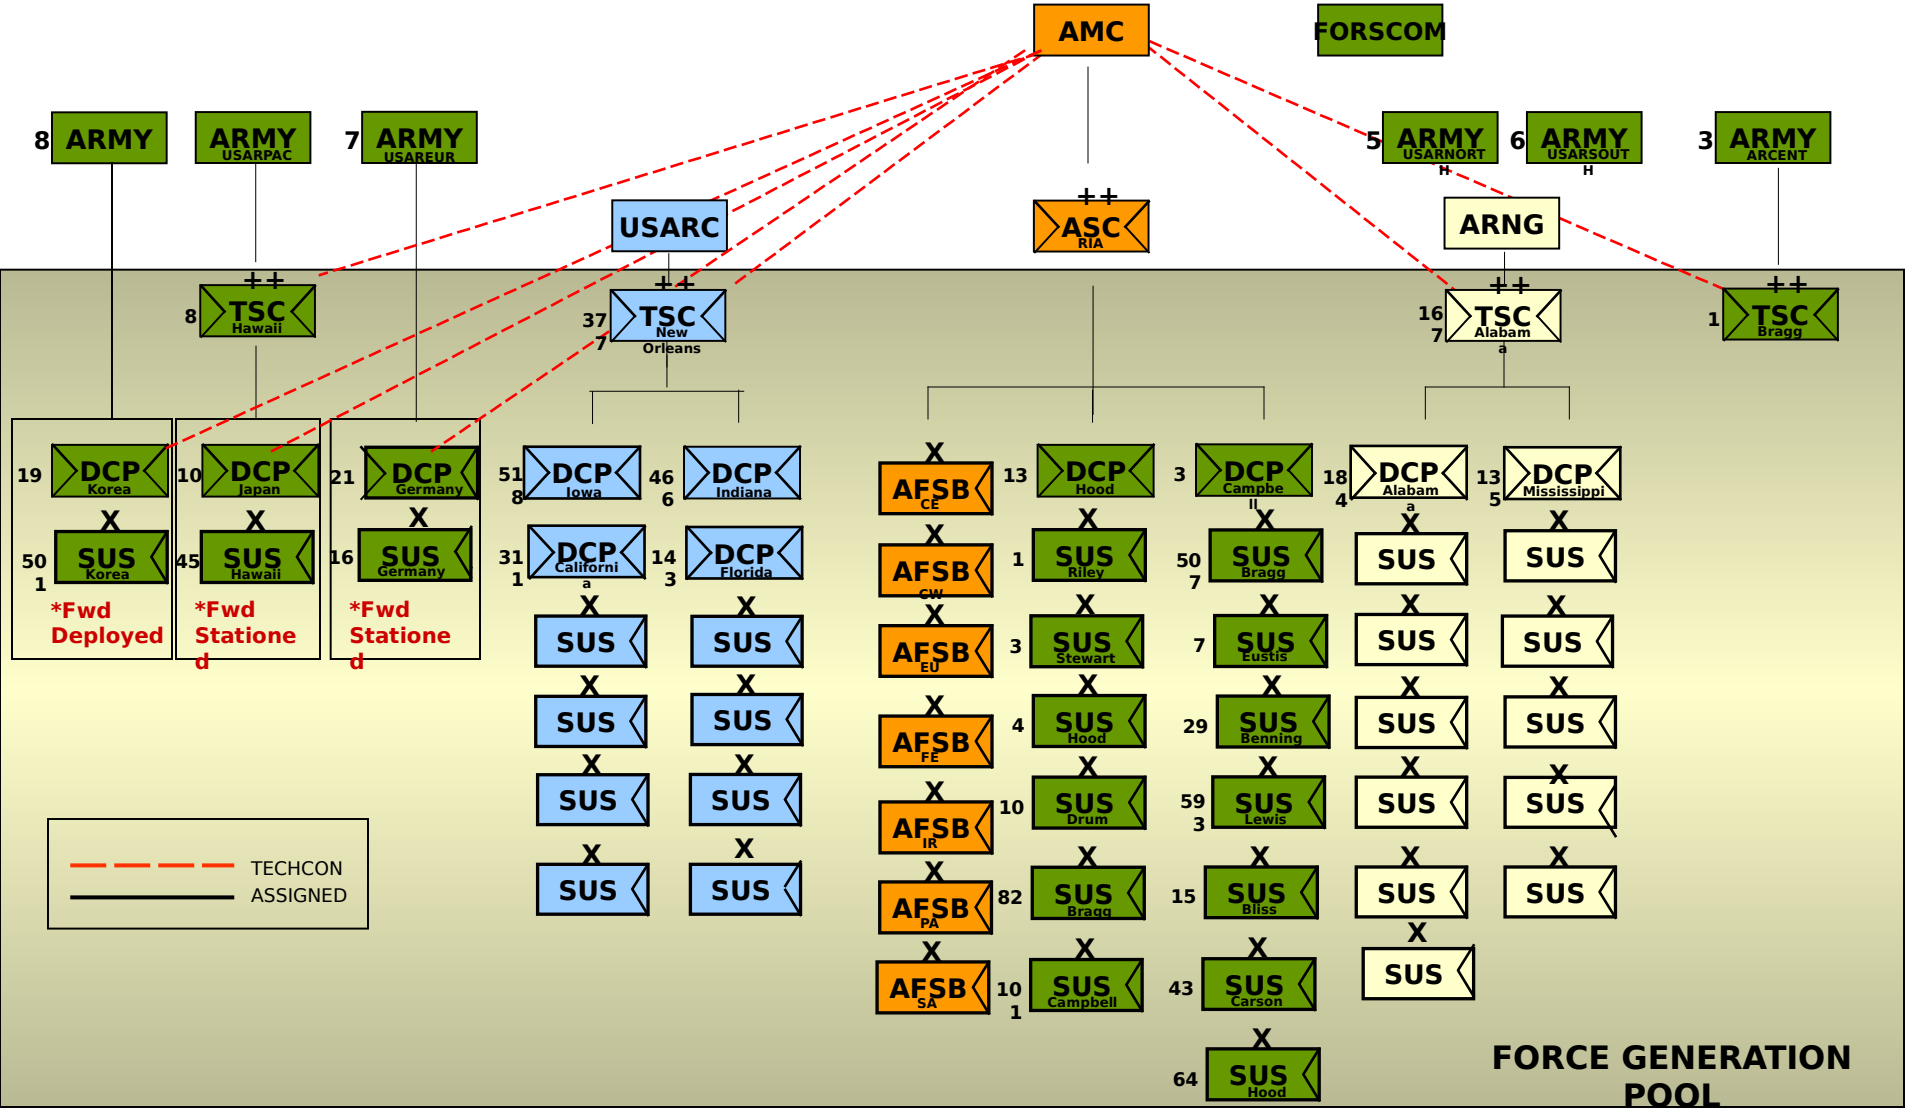
Key Points:

- ASC assigned (ADCON) to AMC
- CONUS based DCPs, Sus Bdes assigned (ADCON) to AMC via ASC
- DCPs and Sus Bdes OPCON to FORSCOM
- AMC has TRO over ASC, AC DCPs, Sus Bdes and AFSBs
- AFSB's assigned to ASC
- DCP's OPCON to Armies during contingencies

ASSIGNED (ADCON) Includes TRO

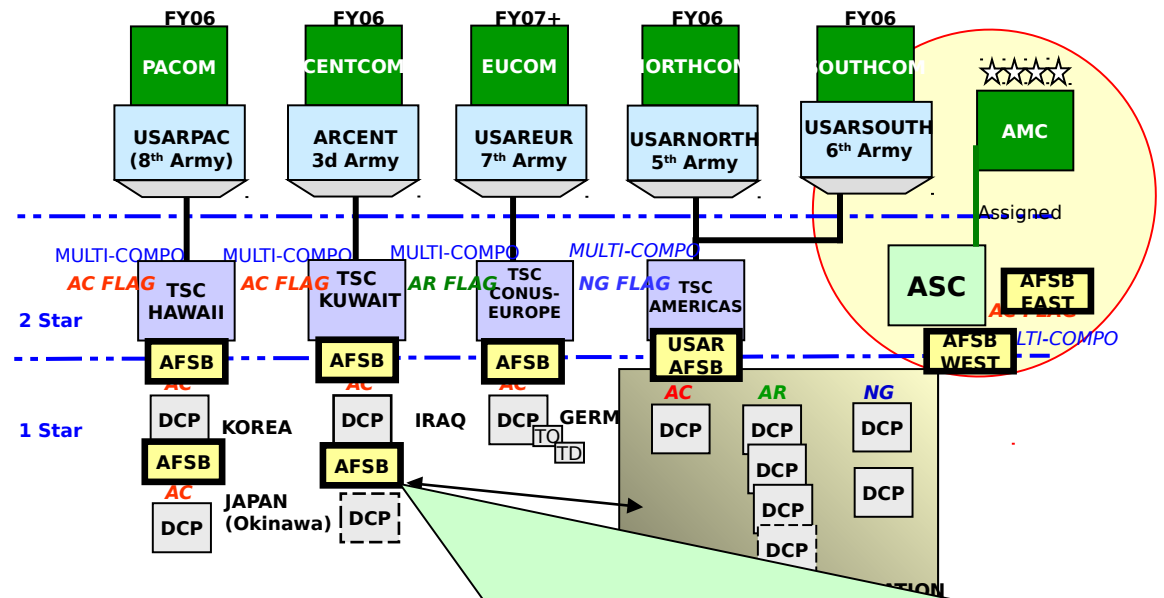
OPCON

Proposed AMC TECHCON Relationship with T



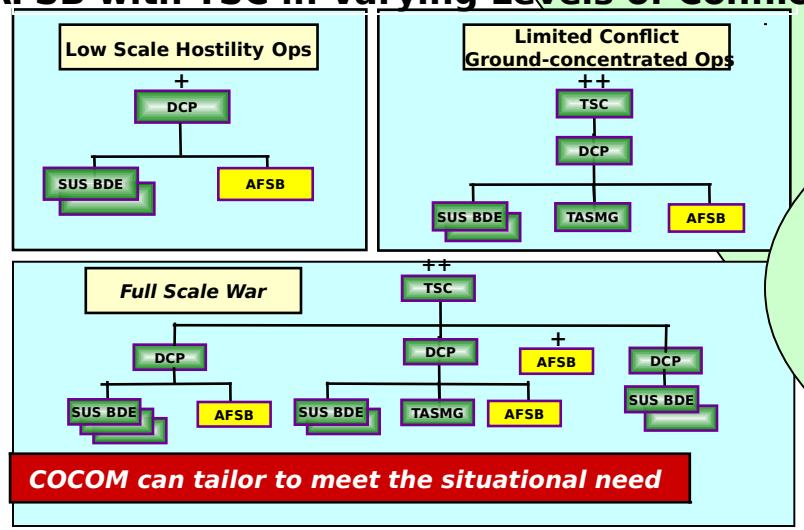
Current "Working" CAC Definition of TECHCON: The authority to provide specialized or professional service, or the exercise or the exercise of professional guidance or direction through the establishment of policies and procedures. Technical control is legal, doctrinal, or policy authority, less than command, over clearly delineated functions. Because technical control originates from outside the chain of command, it is always subject to approval by the commander of the unit performing the affected functions.

Army Field Support Brigades



- AMC Single Face to the Field
- Integrates Acquisition, Logistics, and Technology for Army
- Oversees LSEs supporting Division-Corps and BLSTs supporting BCTs.
- Provides Logistics Assistance
- Facilitates seamless logistics to Army
- Coordinates all outside ALT support to Army/TSC from Army and Strategic Partners
- Provides Contingency Contracting
- OPCON to TSC (or DCP)
- Designed for optimum peacetime _____ (Reach Back) support to the field and for rapid transition to war

AFSB with TSC in Varying Levels of Conflict



Logistics Assistance Program

- Logistic Assistance Element (LAO)
- Logistic Assistance Representatives
- Contractors
- Logistics Civil Augmentation Program

Research, Development Experimentatio

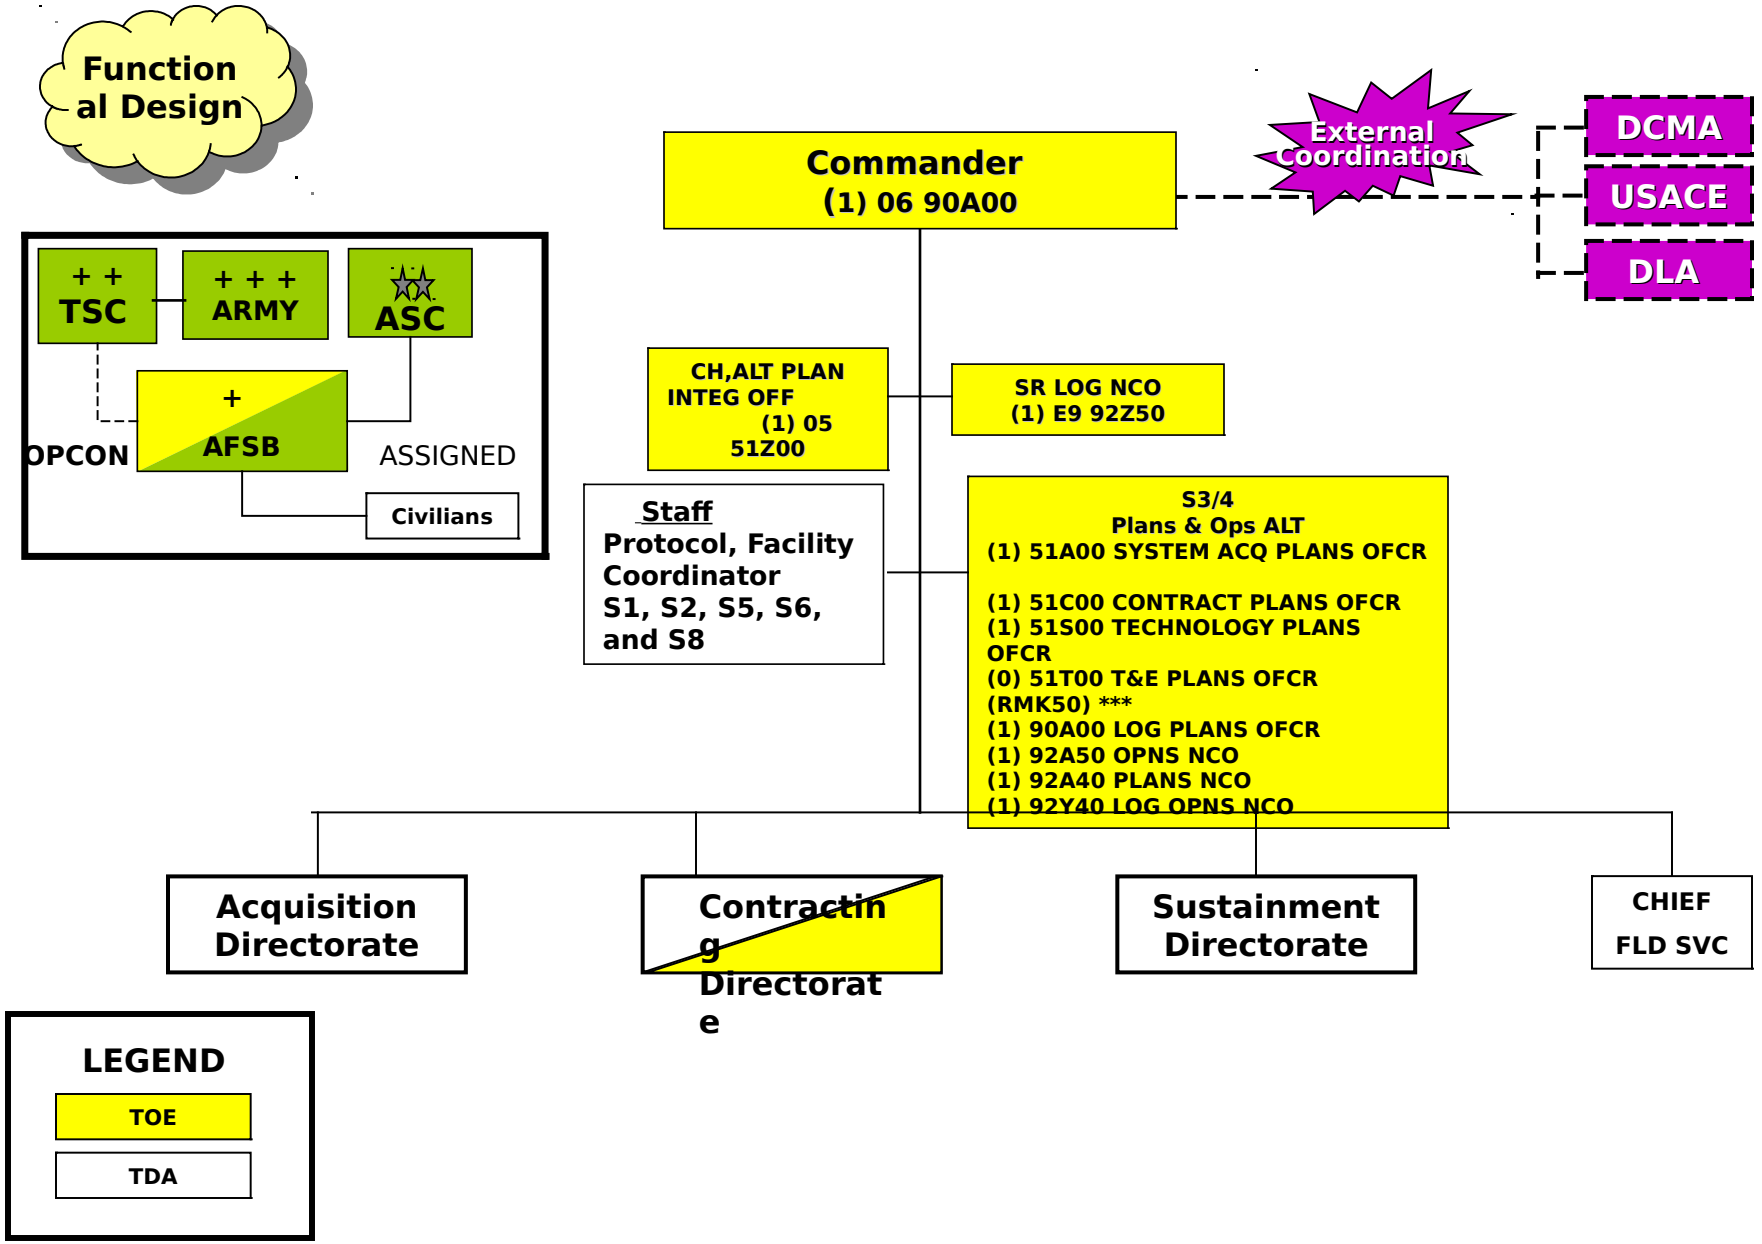
- Testing & Evaluation
- Field Assistance in Science and Technology

- Program & Product Mgrs
- Contracting Officers
- Procurement Analysts
- Cost Analysts

- Contracting Officers
- Contingency Contr. Bns & Teams

- Integrated Materiel Mgmt Center
- Item Managers
- Readiness Centers
- Operational Readiness Analysis Tms
- Integrated Logistics Support Center
- Forward Repair Activities
- Combat Vehicle Evaluation Tms
- RESET Teams
- Surge for special area of emphasis

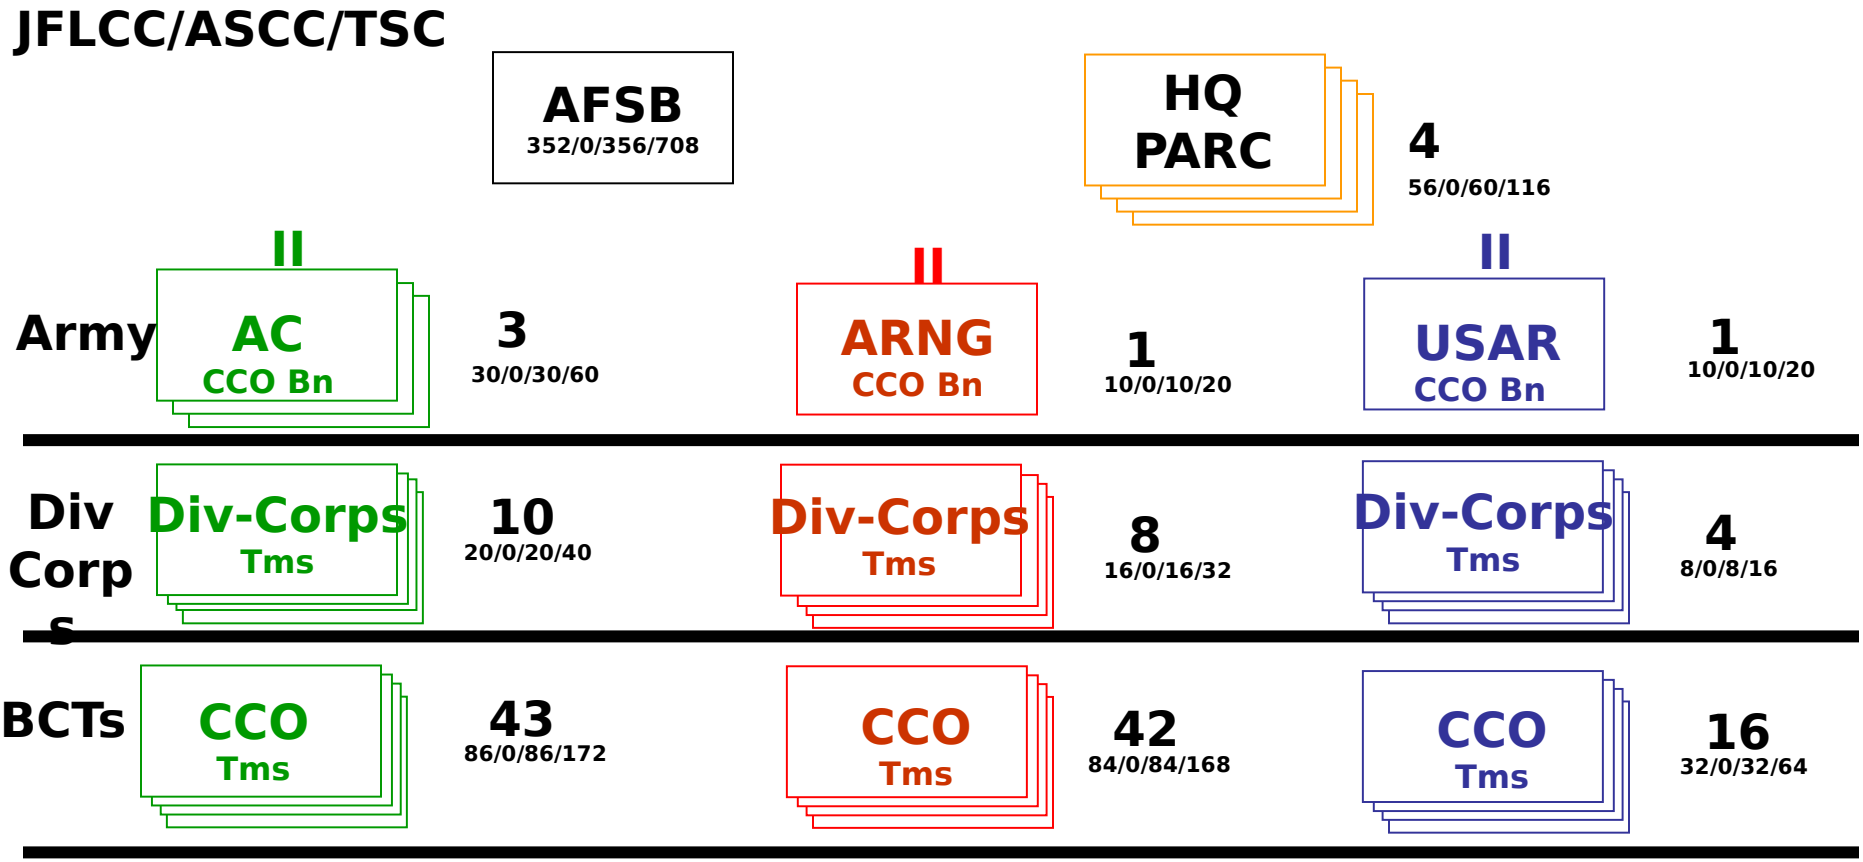
Proposed Organization Chart for AFSB



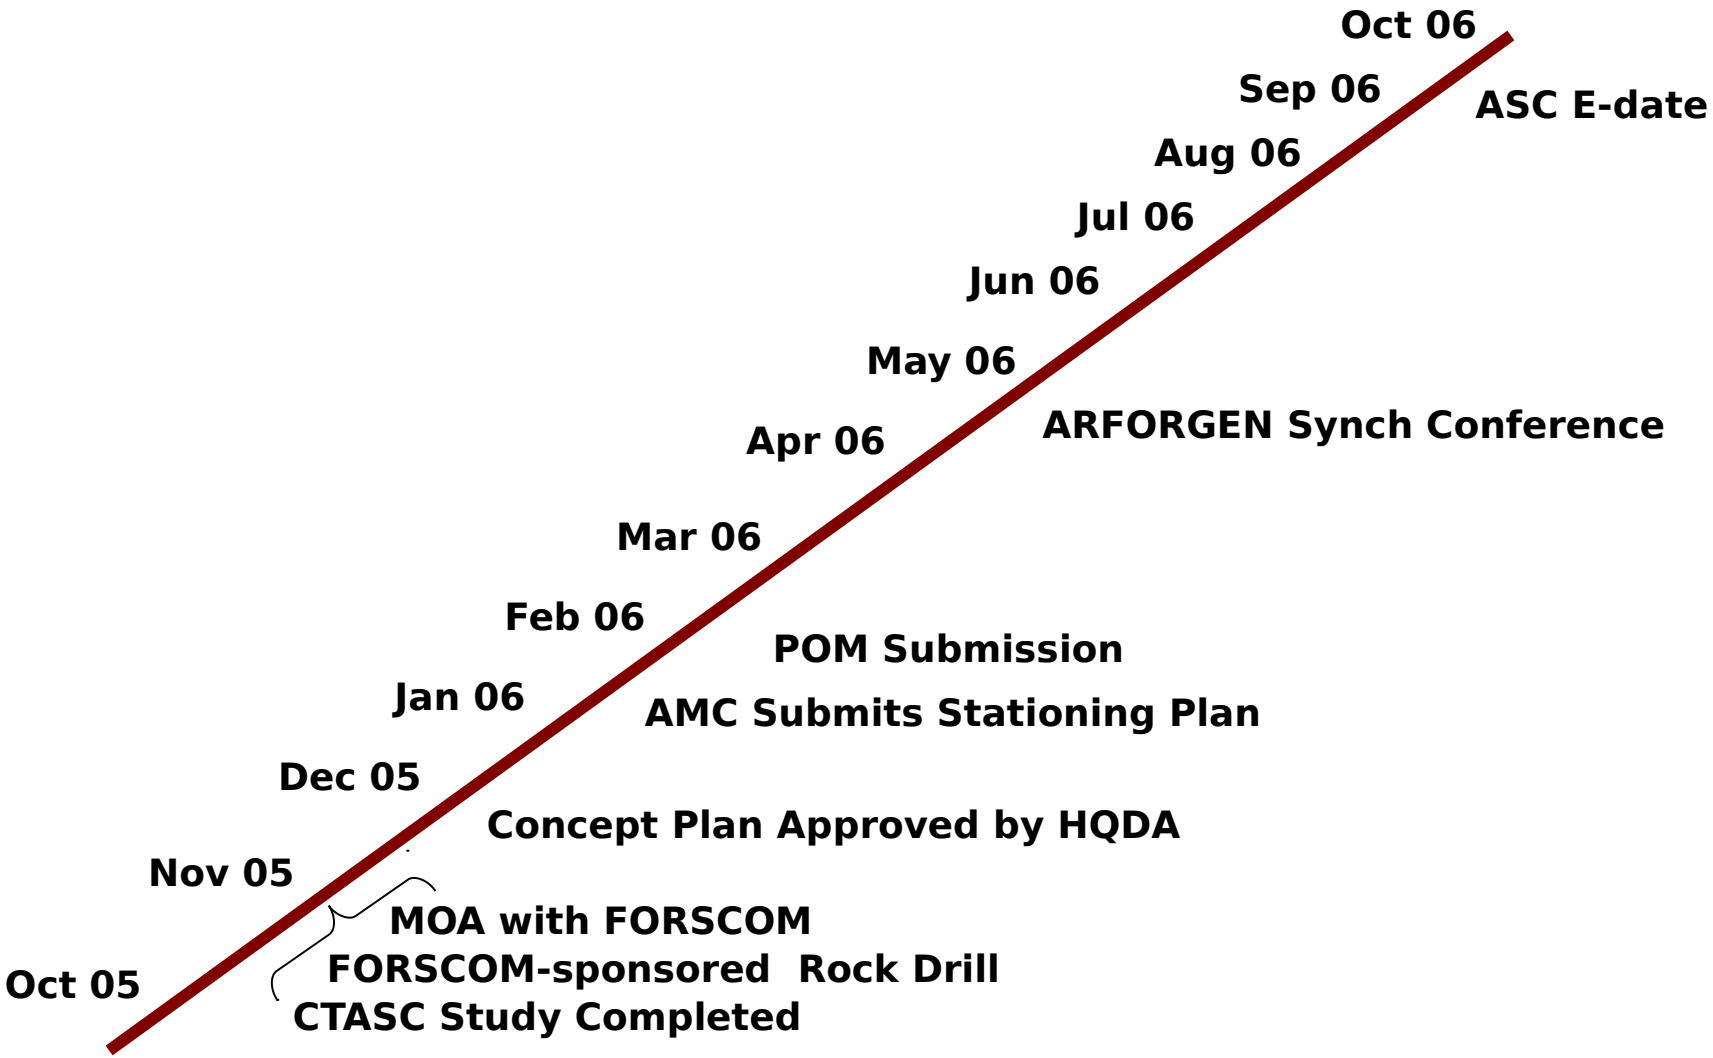
CCO Mission

- Serves as the lead unit for contingency contracting upon designation by the Regional Combatant Commander (RCC) or the Army Service Component Command (ASCC) serving as the Joint Forces Land Component Commander (JFLCC).
- Serves as the theater warfighting PARC to plan and command all Joint contracting mission support for that plan.
- Serves as Army Commander's contracting advisor.
- Plans for and coordinates all contracting functions within a theater.
- Prepares and coordinates execution of the theater contracting support plan.
- Provides command, control, and supervision of all assigned and attached contingency contracting units.
- Provides planning assistance to the supported command for local procurement.
- Modular 4 person contracting team is the basic unit of support.

Proposed Design
Levels of Contracting Support



ASC Way Ahead



* FY06 Funds transfer to occur throughout timeline

Thoughts I want to leave you with…

- AMC has positioned itself to support ARFORGEN by converting its AFSC to become the Army Sustainment Command (ASC) effective 1 October 2006

- This is not just a name change but a real cultural shift on AMC's future support to the field

- ASC will partner closely with our joint, National partners and industrial base to provide the best possible logistics support

- The AFSBs will be assigned to the ASC and will have an important contingency contracting capability

- LOGCAP and CCO will provide increased capability and efficiency
